

CAR DOORS

Because you never get a second chance for a first impression, update your elevator car doors with TK Elevator.

Our standard doors are constructed from metal with a powder coat finish. They can be accented with a decorative design or finish. Upgradeable door finishes include brushed, polished stainless steel or bronze, as well as 5WL patterned stainless steel.

The standard height of our elevator doors is 7'0" (2134 mm), but they can also be constructed up to 9'0" (2743 mm) high. There are three styles to choose from.
