

# LED LIGHT RETRO KIT

The LED retro kit is intended to replace halogen fixtures with LED fixtures in the existing ceiling and space. The standard kit features downlight cans, LED lamps, external 24 V DC power supply, dimming, battery backup, all applicable wiring and a manufacturer's warranty.

The downlight cans are available in black and brushed stainless steel finish with museum-quality full-spectrum lighting that enhances and complements cab interiors.

### Features

- Fits 2¼" (57mm) to 2¾" (70mm) hole size
- Lasts 90% longer than halogens, with a life expectancy of 50,000 hours
- Mercury-free
- No UV light
- Resistant to vibration and shock

### Benefits

- Uses 75–80% less energy
- Less radiated heat
- Brighter, longer-lasting battery backup lighting is standard in every kit
- Reduces maintenance costs
- Meets lighting requirements of A17.1 code

### Product details

Wattage:	4.3 W
LED color:	3500k
CRI:	>80
Luminous density:	260 lm
Efficacy:	60 lm/W @ 12 V DC
