

TRADITIONAL FIXTURES

This line of signal fixtures comes with brushed or polished stainless steel faceplates. The buttons feature a standard white illumination (red, green or blue are optional). The position indicator displays the car's location with a matrix of red LED-illuminated dots.

All signal fixtures are certified by a Nationally Recognized Testing Lab (NRTL) before installation per ASME A17.5.

Features and benefits

- Meets all National Fire Service codes for the U.S. and Canada
- Braille plates feature durable markings that meet the most stringent code requirements
- LED-illuminated buttons available in red, white, blue or green
